Nanostructures

MD simulation of surface smoothing due to cluster impact: estimation of radiation damage
T. Muramoto, K. Itabasi and Y. Yamamura 1
Simulation of cluster impact induced desorption and cooling
R.P. Webb 9
Structure character of copper clusters deposited on argon
L.K. Zang, Z.Y. Pan, Y.X. Wang, Q. Wei, L. Zhou, T.J. Liu and Z.J. Li. 16
Channeling of heavy ions through multi-walled carbon nanotubes
A.V. Krasheninnikov and K. Nordlund 21
Irradiation-induced phase transformations in carbon nanostructures
L.T. Sun, J.L. Gong, Z.X. Wang, D.Z. Zhu, J.G. Hu, R.R. Lu and Z.Y. Zhu 26
Irradiation-assisted substitution of carbon atoms with nitrogen and boron in single-walled carbon nanotubes
J. Kotakoski, J.A.V. Pomoell, A.V. Krasheninnikov and K. Nordlund. 31
Molecular dynamics simulation of silicon nanostructures
C.S. Moura and L. Amaral. 37
Molecular dynamics simulations of interactions of Ar and Xe ions with surface Cu clusters at low impact energies
G.V. Kornich, G. Betz, V. Zaporojtchenko, K.V. Pugina and F. Faupel. 41
Molecular dynamics simulations of sequential cluster ion impacts
T. Aoki and J. Matsuo. 46
Segregation in SiGe clusters
J. Tarus, M. Tantarimäki and K. Nordlund 51
Cluster-size dependence of ranges of 100 eV/atom Au_n clusters
C. Anders and H.M. Urbassek 57
Molecular dynamics simulation of Ni cluster deposition on Cu(0 0 1) surfaces
J.C. Jiménez-Sáez, A.M.C. Pérez-Martín, M. Said-Ettaoussi and J.J. Jiménez-Rodríguez 64
Inherent surface roughening as a limiting factor in epitaxial cluster deposition
K. Meinander, K. Nordlund and J. Keinonen 69
Sputtering of Au (1 1 1) by 64 keV/atom Au clusters
S. Zimmermann and H.M. Urbassek 75
Effect of binding energy and mass in cluster-induced sputtering of van-der-Waals bonded systems
C. Anders and H.M. Urbassek 84

doi:10.1016/S0168-583X(04)01325-4

Metals

Stability and mobility of self-interstitials and small interstitial clusters in α-iron: ab initio and empirical potential calculations
F. Willaime, C.C. Fu, M.C. Marinica and J. Dalla Torre 92
Atomic-scale modeling of clear band formation in FCC metals
D. Rodney 100
RPV steel microstructure evolution under irradiation: a multiscale approach
C.S. Becquart 111
Relation between thermal expansion and interstitial formation energy in pure Fe and Cr
J. Wallenius, P. Olsson and C. Lagerstedt 122
Radiation effects of copper single crystals under stress
M. Doyama, Y. Kogure and T. Nozaki 126
Diffusion of radiation damage in Fe–P systems
S.M.J. Gordon, H. Hurchand, S.D. Kenny and R. Smith 131
Ab initio calculations of vacancy interactions with solute atoms in bcc Fe
E. Vincent, C.S. Becquart and C. Domain 137
Irradiation-induced stiffening of carbon nanotube bundles
M. Sammalkorpi, A.V. Krasheninnikov, A. Kuronen, K. Nordlund and K. Kaski 142
The interaction of P atoms and radiation defects with grain boundaries in an α-Fe matrix
H. Hurchand, S.D. Kenny and R. Smith 146
A study of high-temperature implantation of 72 keV copper ions into nickel
W.-F. Tsai, J.H. Liang, J.J. Kai and G.L. Kulcinski 151
In-cascade interstitial cluster formation in concentrated ferritic alloys with strong solute–interstitial interaction: a molecular dynamics study
D.A. Terentyev, L. Malerba and M. Hou 156
Molecular dynamics simulation of sputtering from a cylindrical track: EAM versus pair potentials
O.J. Tucker, D.S. Ivanov, L.V. Zhigilei, R.E. Johnson and E.M. Bringa. 163
Self sputtering yields of silver under bombardment with polyatomic projectiles
A. Duvenbeck, M. Lindenblatt and A. Wucher 170
Long-term behaviour of irradiated hcp Zr using Monte Carlo simulations
C. Arévalo, M.J. Caturla and J.M. Perlado 176
The influence of the internal displacement cascades structure on the growth of point defect clusters in radiation environment
C.S. Becquart, C. Domain, L. Malerba and M. Hou. 181
Effect of the radiation-induced vacancy emission from voids on the void evolution
V.I. Dubinko and N.P. Lazarev 187
TRIDYN simulation of target poisoning in reactive sputtering
D. Rosén, I. Katardjiev, S. Berg and W. Möller 193

Semiconductors

Silicon potentials under (ion) attack: towards a new MEAM model
B.J. Thijsse 198
Migration of di- and tri-interstitials in silicon
M. Posselt, F. Gao and D. Zwicker. 212
Annealing of vacancy complexes in P-doped silicon
M.G. Ganchenkova, V.A. Borodin and R.M. Nieminen 218
Modeling of amorphous pocket formation in silicon by numerical solution of the heat transport equation
D. Kovač, G. Otto and G. Hobler 226
Computer simulation of neutron transmutation doping of isotopically engineered heterostructures
D.V. Kulikov, V.S. Kharlamov, A.A. Schmidt, K.L. Safonov, S.A. Korolev and Yu.V. Trushin. 230

Dose-rate and temperature dependent statistical damage accumulation model for ion implantation into silicon
J.M. Hernández-Mangas, J. Arias, L.A. Marqués, A. Ruiz-Bueno and L. Bailón 235
The effect of interatomic potential in molecular dynamics simulation of low energy ion implantation
H.Y. Chan, K. Nordlund, J. Peltola, H.-J.L. Gossmann, N.L. Ma, M.P. Srinivasan, F. Benistant and L. Chan 240
Coupling of MC and MD techniques for the calculation of vacancy cluster binding energies
D. Kulikov, L. Malerba and M. Hou 245
Implantation and post-annealing characteristics when impinging small B_n clusters into silicon at low fluence
J.H. Liang and H.M. Han 250
Coupled BC/kLMC simulations of the temperature dependence of implant damage formation in silicon
G. Otto, D. Kovač and G. Hobler 256

Ceramics

Exploring long-time response to radiation damage in MgO
B.P. Uberuaga, R. Smith, A.R. Cleave, G. Henkelman, R.W. Grimes, A.F. Voter and K.E. Sickafus . . 260
Excess kinetic energy dissipation in materials
L.R. Corrales, A. Chartier and R. Devanathan. 274
Annealing simulations of nano-sized amorphous structures in SiC
F. Gao, R. Devanathan, Y. Zhang and W.J. Weber 282
Developing pair potentials for simulating radiation damage in complex oxides
B.S. Thomas, N.A. Marks and B.D. Begg 288
Computational model of alpha-decay damage accumulation in zircon
H.L. Heinisch and W.J. Weber 293
Molecular dynamics simulation of defect production in collision cascades in zircon
R. Devanathan, L.R. Corrales, W.J. Weber, A. Chartier and C. Meis 299
Mechanism of void growth in irradiated NaCl based on exiton-induced formation of divacancies at dislocations
V.I. Dubinko, D.I. Vainshtein and H.W. den Hartog 304

Carbon-based materials

MD study on high-energy reactive carbon and oxygen cluster impact leading to surface erosion on diamond
Y. Yamaguchi and J. Gspann 309
Molecular dynamics simulation of the impact behaviour of various hydrocarbon species on DLC
E. Neyts, A. Bogaerts, R. Gijbels, J. Benedikta and M.C.M. van de Sanden 315
He, Ne, Ar-bombardment of carbon first wall structures
P. Träskelin, K. Nordlund and J. Keinonen 319

Electronic effects

Electronic excitation in atomic collision cascades
A. Duvenbeck, Z. Sroubek and A. Wucher 325
A molecular dynamics model for the Coulomb explosion
R. Smith, D. Ramasawmy and S.D. Kenny 330
Monte Carlo simulation of electron depth distribution and backscattering for carbon films deposited on aluminium as a function of incidence angle and primary energy
M. Dapor 337
A Monte-Carlo study of sub-keV electron transport in water: the influence of the condensed phase
D. Emfietzoglou, G. Papamichael, I. Androulidakis, K. Karava, K. Kostarelos, A. Pathak and M. Moscovitch 341

Ion beam analysis

Bayesian reconstruction of surface roughness and depth profiles
M. Mayer, R. Fischer, S. Lindig, U. von Toussaint, R.W. Stark and V. Dose 349
Multiscale approach for the analysis of channeling profile measurements of ion implantation damage
G. Hobler, G. Otto, D. Kovač, L. Palmetshofer, K. Mayerhofer and K. Piplits 360
Bayesian data analysis for ERDA measurements
E. Edelmann, K. Arstila and J. Keinonen 364
Simulation studies on sputtering in rough surface
T. Kenmotsu, Y. Yamamura, T. Muramoto and N. Hirotani 369
Ion sputtering at grazing incidence for SIMS-analysis
M. Ullrich, A. Burenkov and H. Ryssel 373
Double scattering in RBS analysis of PtSi thin films on Si
N.P. Barradas and C. Pascual-Izarra 378
Artificial neural network analysis of multiple IBA spectra
H.F.R. Pinho, A. Vieira, N.R. Nené and N.P. Barradas 383
Simulated annealing and Bayesian inference applied to experimental stopping force determination
C. Pascual-Izarra and G. García 388
